

Malaria in Africa has been an issue for many years. When I chose to see Congo From the Dashboard we can see that central African countries such as Congo were most affected by this disease and it's due to the fact that this country doesn't have clean water resources

Which countries are most affected?

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

How have the number of malaria deaths changed over time in **Egypt**?

On the other hand when I selected a specific Northern African countries from the map such as Egypt we can see that there is a huge difference in cases and it might be because of the clean water resources in Northern African countries and specifically the Nile River

Which countries are most affected?

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

How have the number of malaria deaths changed over time in Algeria, Angola, Benin and 44 more?

.Moreover when I selected all the African countries in the map we can see that from 2003 to 2010 the deaths in cases were started rising but after 2010 we can see the decline in deaths and it's because of how the world health organization and the UN responded to these cases.
